Introduction to ICT (2018)

Introduction to Information and Communication Technology (ICT) delves into the core concepts and practical applications of ICT across different sectors. This course covers vital topics including computer hardware, software, internet usage, and the impact of digital media on communication. It is designed to equip students with the skills and knowledge necessary to effectively harness technology in both professional and everyday contexts, thereby enhancing productivity and connectivity.

Microsoft Office Essential (2020)

"Microsoft Office Essential" is a foundational course designed to provide educators and professionals with comprehensive training in the core Microsoft Office applications: Word, Excel, PowerPoint, and Outlook. This course focuses on building essential skills necessary for efficient document creation, data management, impactful presentations, and effective communication. Through practical examples and hands-on exercises, participants will learn to navigate and utilize these tools to enhance productivity in their professional environments.

1.2.5 Course completion certificates

T.N. Rao College of Teacher Education provides an extensive array of self-study courses meticulously designed to support the holistic development of aspiring educators. The curriculum encompasses a broad spectrum of topics, ensuring that educators are well-rounded and equipped with both traditional and contemporary skills. One of the cornerstones of this program is the course on Gandhian Philosophy, which delves into the timeless ideals of Mahatma Gandhi. This course encourages students to integrate these values into their personal and professional lives, fostering a deep sense of social responsibility and ethical leadership.

In addition to the philosophical and ethical underpinnings provided by Gandhian Philosophy, the college places a significant emphasis on modern Information and Communication Technology (ICT) skills. The self-study courses include "Introduction to ICT," which provides a foundational understanding of ICT concepts, and "Microsoft Office Essentials," which equips educators with the practical skills needed for effective document creation, data management, and presentation. "Digital Literacy" ensures that educators are proficient in navigating the digital landscape, while "Google Tools" and "Use of Social Media in Education" offer insights into utilizing popular digital platforms for educational purposes. The "E-Learning Platforms" course prepares educators to leverage online teaching tools effectively, making them adept at creating engaging and interactive online learning environments. Together, these courses create a comprehensive learning experience that empowers future educators to thrive in a dynamic educational landscape by blending traditional wisdom with modern technological prowess.
